Bellaire High School

Comprehensive Counseling and Guidance Program

2007-2008

The mission of the counseling and guidance program is to assess and address the needs of the student body and to heighten communication between the counseling staff and the Bellaire High School community.

Counseling is a joint effort of counselors, teachers, parents, administrators, and students.

Counseling and Guidance Philosophy

The counseling and guidance program at Bellaire High School is designed to help ALL students in the following:

- ☞ making decisions about course selections
- ☞ choosing a vocation
- ☞ selecting a college, technical school or other career path
- ☞ coping with personal, social, and/or academic problems

Student counseling and guidance is held in confidence in a friendly, permissive, and frank manner, which permits each individual to express him/herself fully with a view of making his/her own decisions about any course of action.

The program helps students become adjusted to their present situations and assists them in planning for a future that will be in line with their interests, abilities, and social needs.

Parents, teachers, and students are encouraged to confer with the counseling personnel when assistance is needed.
